Professional Profile

Aspiring Data Analyst and Software Developer, currently studying Computing at Solent University and progressing from the Foundation Year toward a BSc (Hons) degree. Building strong practical capability in Python, SQL, JavaScript, HTML, CSS, and data analysis through academic study, personal projects, and continuous self-directed learning.

I enjoy turning data into meaningful insight and building practical software that solves real problems. My long-term goal is to develop intelligent, data-driven applications that support business decision-making and automation.

Before entering computing, I gained over 20 years of professional experience across engineering, manufacturing, legal services, logistics, transport, and customer-facing roles. These environments strengthened my analytical thinking, communication, reliability, and adaptability — qualities I now apply directly to my development as a technology professional.

Career Objective

To build a career as a Data Analyst while continuing to develop my software engineering skills, with particular interest in designing intelligent business applications that combine analytics, automation, and modern software development. As my experience grows, I aim to contribute to organisations by delivering meaningful insight and creating long-term value through data-driven solutions.

Technical Skills

Programming & Development: Python, SQL, JavaScript, HTML5, CSS3, FastAPI, Git & GitHub, VS Code

Data Skills: Data Cleaning, SQL Queries, Data Analysis, Data Visualisation (in progress), Microsoft Excel, AI-assisted Development

Professional Skills: Analytical Thinking, Problem Solving, Communication, Adaptability, Leadership, Teamwork, Attention to Detail, Continuous Learning

Education

BSc (Hons) Computing (Foundation Year) — Solent University, Southampton 2026 – Present

Developing core skills in programming, software development, databases, and computational thinking. Building practical experience through personal projects with a growing focus on data analytics, web development, and intelligent business applications.

Diploma Engineer Degree — Automotive Engineering Technology 1997 – 2003

Studies included engine technology, vehicle mechanics, and automotive electrical engineering.

Professional Experience

Driver — Elis UK July 2024 – February 2026

- Managed daily logistics and delivery operations with consistent reliability and accuracy.
- Maintained strong organisational discipline and time management in a fast-paced environment.
- Built accountability and attention to detail directly transferable to structured, process-driven work.

Automotive Technician / Team Leader / Key Operator-Supervisor — Leyland Trucks (DAF UK) June 2021 – August 2024

- Progressed through multiple technical and supervisory roles within a high-performance manufacturing environment.
- Led process improvements and quickly learned and applied complex technical systems.
- Supervised team operations, balancing quality standards with production targets.

HR Supervisor & Solicitor Assistant — KL Law Ltd, London

July 2016 – May 2021

- Supported legal documentation, HR administration, and day-to-day business operations.
- Developed strong analytical, organisational, and written communication skills.
- Handled confidential information with accuracy and professionalism.

PCV Driver / Relief Inspector — Stagecoach Bus, Preston Depot

February 2008 – July 2016

- Delivered consistently high standards of customer service across daily operations.
- Progressed into supervisory responsibilities, including operational coordination and service-standard monitoring.
- Resolved day-to-day operational issues efficiently to maintain service reliability.

Sales Consultant / Sales Executive / Marketing & Customer Relations Specialist — WGN Real Estate Exchange

June 2000 – December 2008

- Built strong communication, negotiation, and customer relationship management skills.
- Worked across sales, marketing, and property services functions.
- Developed a client-focused approach that supported long-term business relationships.

Dear Hiring Manager,

I am writing to express my interest in a student placement, internship, or trainee opportunity within your organisation as I continue my transition into computer science. I am currently progressing through the Foundation Year of my BSc (Hons) Computing degree at Solent University Southampton, and I am seeking an opportunity where I can apply my developing technical skills while learning from experienced professionals.

I am actively building capability in Python, SQL, JavaScript, HTML, CSS, FastAPI, and data analysis through academic study and personal projects. I bring a strong foundation of transferable strengths, including analytical thinking, problem solving, reliability, teamwork, and adaptability, developed across more than 20 years of professional experience in engineering, manufacturing, legal services, logistics, transport, and customer-facing roles.

I am highly motivated to continue developing my technical skills through hands-on experience and meaningful contribution within a professional team, and I am particularly interested in opportunities that will help me grow my knowledge of software development, data analytics, and modern computing practice.

Thank you for considering my application. I would welcome the opportunity to discuss how my motivation, transferable experience, and developing technical skills could make me a valuable addition to your organisation.

Yours faithfully,

Andrzej Majka
