COMPANY

YOUREC-AJM

yourec-ajm.com

TECHNICAL SKILLS

- JavaScript
- HTML & CSS
- Android Studio — *mobile app development*
- Python *(beginner)*
- SQL *(beginner)*
- Git & GitHub
- VS Code
- Domain Setup & Hosting

SOFTWARE & SYSTEMS

- Windows *(confident user since Windows 95)*
- Microsoft 365 — Word *(advanced)*
- Microsoft 365 — Excel *(developing)*

AI-ASSISTED DEVELOPMENT

- Works fluently across multiple leading AI platforms
- Understands how different AI systems reason and generate output
- Skilled at prompt engineering for precise, efficient results
- Applies AI daily to speed up coding, debugging & problem-solving

CREATIVE & DESIGN

- UI & Visual Design — *praised by tutor*
- Presentation Design
- Social Media Content
- Advertising & Marketing Concepts

CURRENTLY LEARNING

PROFESSIONAL PROFILE

I'm a Foundation Year Computing student at Solent University and founder of YOUREC-AJM, my own software development venture, where I'm building a portfolio of mobile applications spanning personal finance, lifestyle, and productivity. I learn by building: every project I take on — from my self-built portfolio website to the apps now in development — is built hands-on, no templates or shortcuts, and that work has already been praised by my tutor for its visual and technical quality.

A key part of how I work is practical fluency with AI. I understand how different AI systems reason and generate output, and I know how to prompt and direct them precisely to accelerate development, debug problems, and explore solutions faster than working alone — a skill I see as increasingly central to modern software development.

Before computing, I spent over 20 years across driving, engineering, HR administration, and sales — experience that gave me real discipline: finishing what I start, showing up reliably, and working well with people who don't think the way I do. I bring that same reliability to building software today.

CAREER OBJECTIVE

My goal is to grow YOUREC-AJM into a genuine software and app development business, while continuing to sharpen my technical skills through my degree and hands-on project work. I'm looking for opportunities to contribute to real development projects, learn from experienced engineers and designers, and bring my own strengths in design, AI-assisted development, and practical problem-solving to a team.

EDUCATION

BSc (Hons) Computing — Solent University, Southampton

2026 – Present

Passed the Foundation Year with a Grade B; now progressing into Year 1. Developing core skills in programming, software development, databases, and computational thinking, with practical experience built through personal projects including a self-built portfolio website and apps in development.

Technikum Diploma — Automotive Electronics & Electrical Engineering (Poland)

1997 – 2003

5-year Polish technical secondary programme — UK Level 3 equivalent (comparable to A-levels / BTEC National). Included regular practical placements in real automotive workshop environments, covering engine technology, vehicle mechanics, and automotive electrical systems.

PROFESSIONAL EXPERIENCE

Driver — Elis UK

July 2024 – February 2026

- Managed daily logistics and delivery operations with consistent reliability and accuracy.
- Maintained strong organisational discipline and time management in a fast-paced environment.
- Built accountability and attention to detail directly transferable to structured, process-driven work.

Automotive Technician / Team Leader / Key Operator-Supervisor — Leyland Trucks (DAF UK)

June 2021 – August 2024

- React
- Advanced Python
- API Integration
- App Store Deployment

PROFESSIONAL SKILLS

- Analytical Thinking
- Problem Solving
- Communication
- Adaptability
- Leadership & Teamwork
- Attention to Detail

- Progressed through multiple technical and supervisory roles within a high-performance manufacturing environment.
- Led process improvements and quickly learned and applied complex technical systems.
- Supervised team operations, balancing quality standards with production targets.

HR Supervisor & Solicitor Assistant — KL Law Ltd, London

July 2016 – May 2021

- Supported legal documentation, HR administration, and day-to-day business operations.
- Developed strong analytical, organisational, and written communication skills.
- Handled confidential information with accuracy and professionalism.

PCV Driver / Relief Inspector — Stagecoach Bus, Preston Depot

February 2008 – July 2016

- Delivered consistently high standards of customer service across daily operations.
- Progressed into supervisory responsibilities, including operational coordination and service-standard monitoring.
- Resolved day-to-day operational issues efficiently to maintain service reliability.

Sales Consultant / Sales Executive / Marketing & Customer Relations Specialist — WGN Real Estate Exchange

June 2000 – December 2008

- Built strong communication, negotiation, and customer relationship management skills.
- Worked across sales, marketing, and property services functions.
- Developed a client-focused approach that supported long-term business relationships.
